

# How to Install the m2eclipse Plugin

## How To Install Maven m2eclipse Plugin

Note: Recent releases of Eclipse (Mar, Neon, Oxygen) already have the m2eclipse plugin installed. Only follow these steps if you don't have the plugin installed.

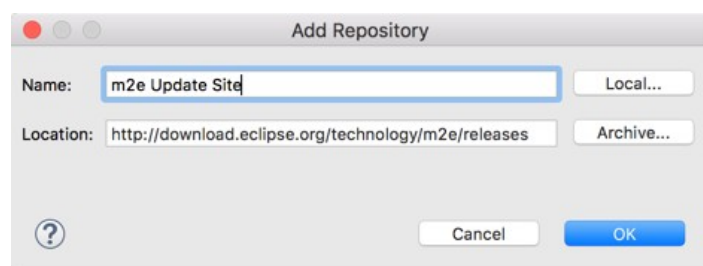

### 1. In Eclipse, select **Help > Install New Software**

This will display the Install dialog

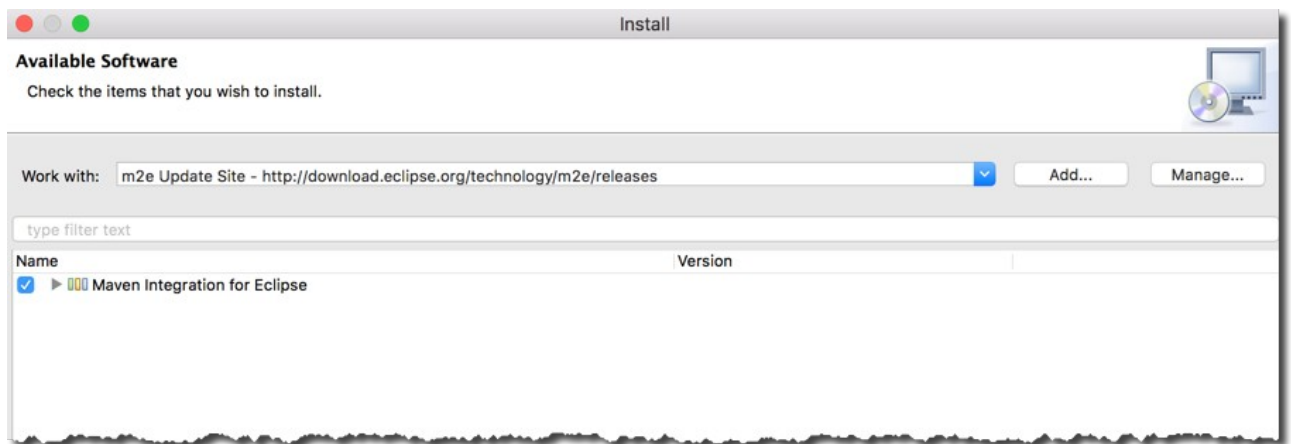

### 2. Click the **"Add..."** button.

### 3. In the dialog, enter the following from the screenshot below:

4. Wait for a couple of minutes while Eclipse fetches the files
5. In the dialog, check the box for "**Maven Integration for Eclipse**"

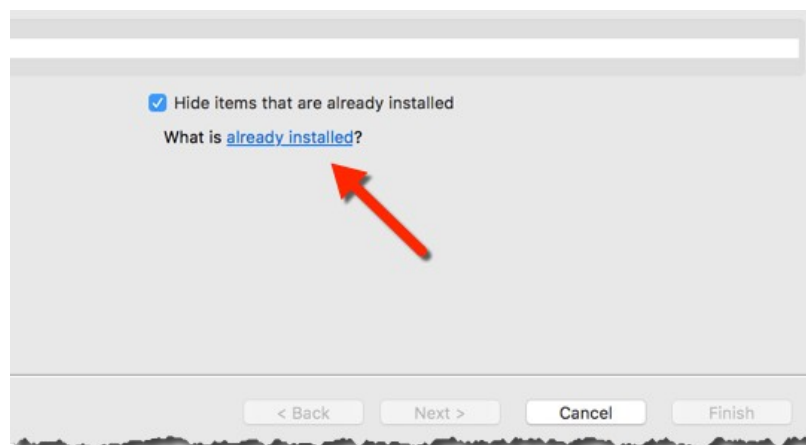

6. Click Next
7. It will show a dialog to review components, Click **Next**
8. Accept the License Agreement, Click **Finish**
9. Once installation is complete, restart Eclipse.

---

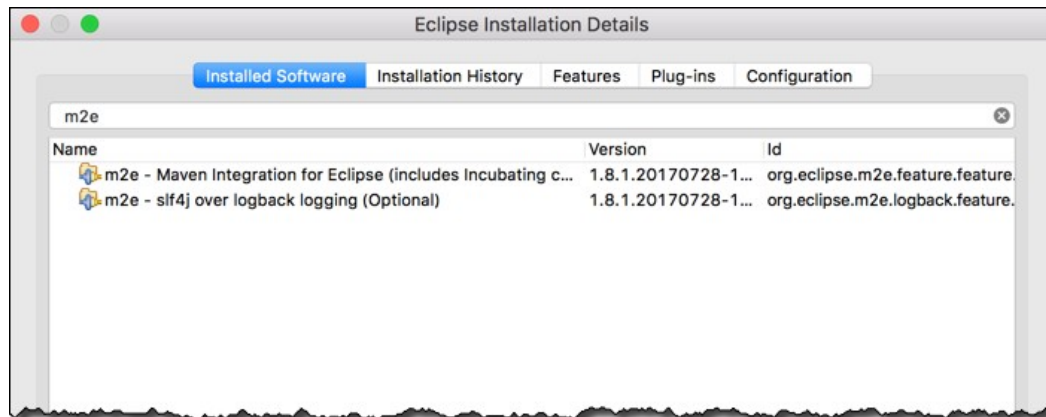

### Verify Installation

10. In Eclipse, select **Help > Install New Software**
11. In bottom right of dialog, you will see a blue link: **What is already installed?**

12. Click the link

13. In the dialog, filter on the text: **m2e**

14. If you see the m2e entries, then the plugin was installed successfully :-)
